RE: Lehigh Southwest Cement Company's Application for Permanente Quarry Reclamation Plan Amendment, May 2019

Dear Mr. Salisbury:

The Town of Los Altos Hills ("Town") submits these preliminary comments regarding the May 22, 2019 application from Lehigh Southwest Cement Company ("Lehigh") for the proposed Reclamation Plan Amendment ("Application") to Santa Clara County Planning Department ("County"). The Application proposes significant changes from the existing County-approved 2012 Reclamation Plan Amendment for Permanente Quarry ("2012 Rec Plan") and these changes are concerning for the residents of Los Altos Hills. The Application raises concerns for the Town regarding scenic views, water quality, air quality and truck traffic as well as continued delays in the court-ordered restoration of Permanente Creek.

Protection of Scenic Views

The Town urges the County to enforce the 1972 Ridgeline Protection Easement deeded by Lehigh's predecessors to the County. Preservation of natural beauty and natural resources was a guiding principle in the formation of the Town of Los Altos Hills and continues to steer the Town's planning policies and ordinances. The 1972 Ridgeline Protection Easement shields from view the massive mining and cement operations of Lehigh.

In direct violation of the 1972 Ridgeline Protection Easement, the Application proposes mining the ridgeline, dropping the ridge elevation by approximately 100 feet for a distance of 3000 feet along the ridge visible from Town. In addition, the Application proposes to increase the height of the West Material Storage Area ("WMSA") by 160 feet allowing this mass of mining waste to be visible beyond the ridgeline. The 1972 Ridgeline Protection Easement Deed "assigns forever" from Kaiser Cement & Gypsum Corporation and its successors as Grantor to Santa Clara County as Grantee protection of "natural beauty and scenic attributes". The deed states the "Grantor shall not lower the ridgeline described in Exhibit 'B' for mining, quarrying or other purposes below the sea level elevations along that certain line labeled 'Proposed Future Ridgeline' ... nor will the

Grantor mine, quarry or otherwise excavate for minerals or mineral materials in the area shown as the 'northeast slope' on Exhibit 'B'".

Blasting explosives on the ridgetop, an area exposed to high wind erosion, has the potential to carry larger volumes of fugitive dust to wider distances.

Protection of Water Quality

The Town recommends that the County not allow further delays to the court-ordered restoration of Permanente Creek on Lehigh's property. Water quality impairments have resulted in a lawsuit by Sierra Club as well as Federal and State regulatory actions that required Lehigh to construct two onsite water treatment facilities to treat quarry pit water before it is released into Permanente Creek. The Application proposes to delay the court-ordered restoration of Permanente Creek by 10 years or more. Permanente Creek continues to be ravaged by Lehigh's mining activities. On July 9, 2019 the Regional Water Quality Control Board issued a Notice of Violation to Lehigh for a landslide from the Yeager Yard into Permanente Creek. Delays to the stream restoration must not to be allowed.

The application proposes a significant and concerning departure from the county-approved 2012 Rec Plan pertaining to the West Material Storage Area ("WMSA"), a massive mountain of mining waste (currently 48 million tons). The Application proposes to increase the mass of WMSA and to leave the overburden in place. This is in direct contradiction with the 2012 Rec Plan which required Lehigh to backfill the North Quarry pit with the on-site WMSA mountain of material. The Application cited water quality concerns potentially caused from moving WMSA; however, the 2012 Rec Plan and subsequent 2018 Regional Water Quality Control Board's Water Discharge Requirements for Lehigh already approved backfilling the pit with WMSA material. Years of water quality monitoring of quarry pit water and seepage from WMSA resulted in new water treatment facilities and regulations to manage existing contaminants. Importation of up to 60 million tons of off-site material to be placed in the pit with substantial portions submerged below the water table raises additional water quality questions.

Truck Traffic

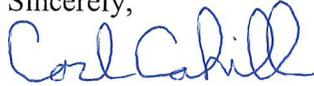

The Application proposal to import up to 60 million tons of off-site construction soil to fill the quarry pit raises serious traffic and emissions concerns. By Lehigh's estimate, 666 trucks per day year-round for 30 to 40 years would traverse local streets. The increased traffic, emissions and congestion would negatively impact health, safety and quality of life for nearby residents. The Town recommends denying the Application's proposal to import soil as a primary means to reclaim the quarry pit. The 2012 Rec Plan to backfill the North Quarry by means of conveyors of on-site material is substantially less detrimental to the community than this Application. The Application's proposal for soil importation delays the pit reclamation timeline by over 25 years.

Conclusion

The Town shares concerns raised by our neighbors, City of Cupertino (letter dated July 3, 2019), City of Los Altos (letter dated July 31, 2019) and Midpeninsula Regional Open Space Authority (letter dated July 12, 2019) in their letters to the County regarding the Application. The County's incomplete letter of July 22, 2019 raises additional concerns about existing violations and inadequate geologic reports. The Application is detrimental to the Town's natural resources and residents, and therefore the Town of Los Altos Hills requests the County to firmly uphold key elements of the 2012 Rec Plan and enforce the 1972 Ridgeline Protection Easement.
