- 4-lane Concept with Intersection Improvements
 - Park strips not impacted
 - Trees and existing aesthetic features not affected
 - Select intersection improvements to benefit localized circulation

Page Mill/Foothill Intersection Concepts

1. At-grade improvements
2. Grade separations – developing 3 concepts with a variety of grade options and configurations to serve motor vehicles, bicycle, and pedestrian circulation
3. To be provided for review and input at a community meeting in November timeframe

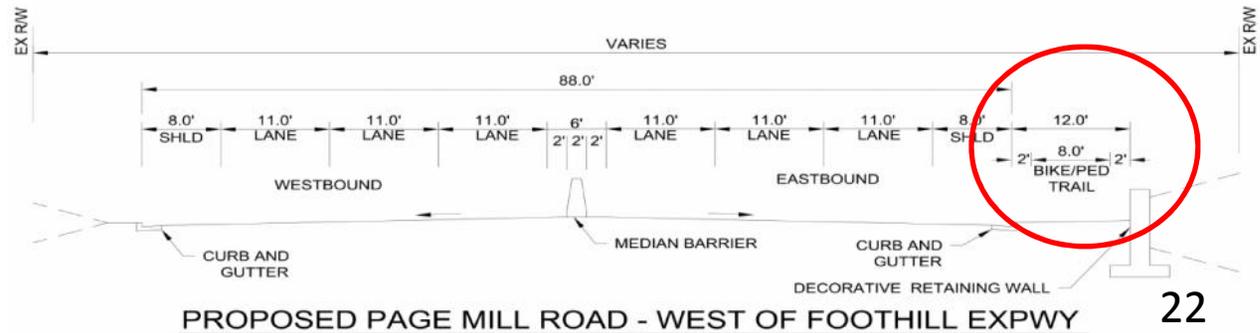

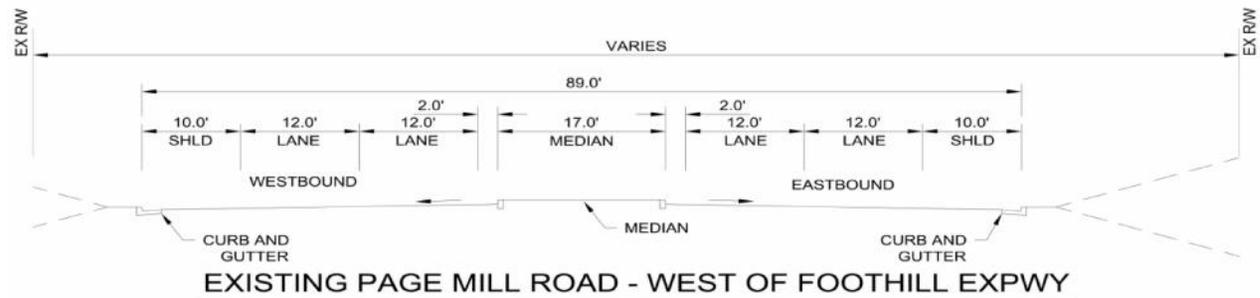

Between I-280 and Foothill Expressway

Design Basis

- Remain within existing roadway limits
- Minimize impacts to hillsides
- Utilize existing Right-of-Way
- Increase bike / ped connectivity

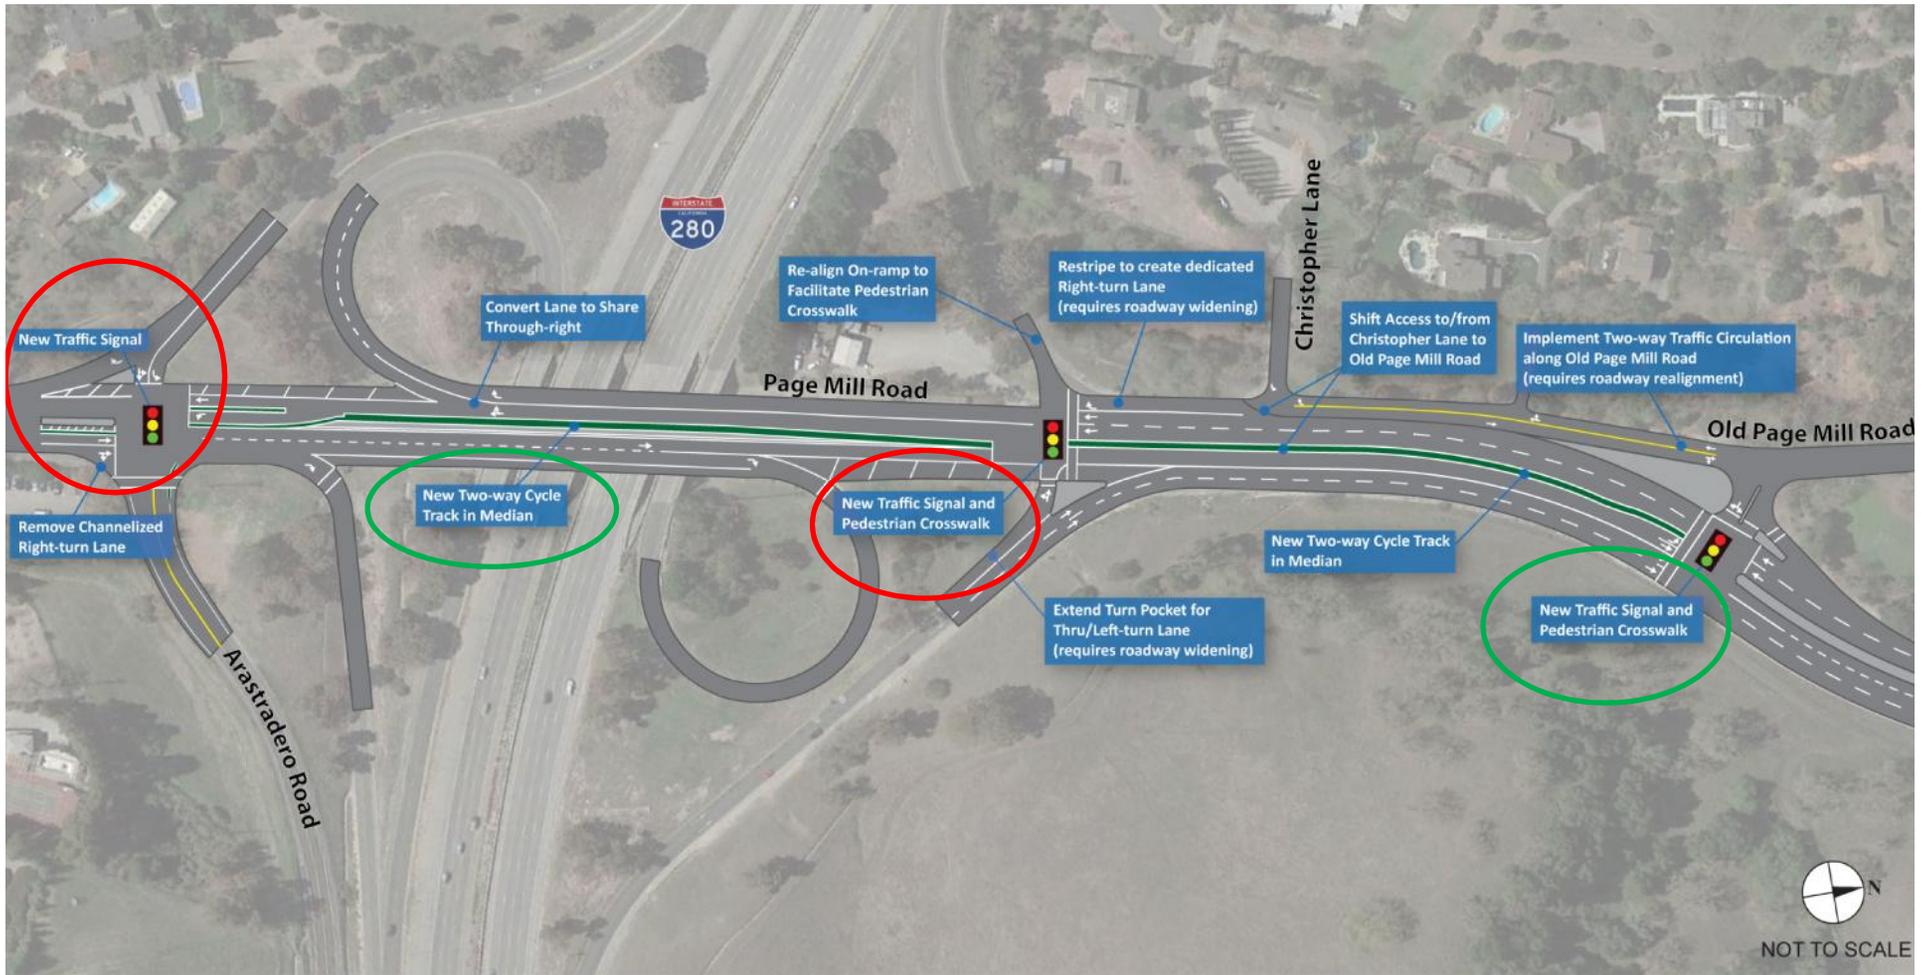

I-280/Page Mill Interchange

- Corridor approach:
 - County to study as part of proposed improvements to widen Page Mill and improve congested intersections
 - Expand concept planning to include park-and-ride lot and Arastradero Road intersection
 - Refine previously identified improvements options
 - Develop overall concept plan for ultimate design that can be implemented in a phased approach
- Technical Working Group of staff from County, Los Altos Hills, Palo Alto, Caltrans, and VTA

Caltrans Proposal with Enhancements

Caltrans Proposal with Enhancements

Advantages

- Can be implemented in phases starting with SB off-ramp signal
- Caltrans could move project to construction in shorter time

Disadvantages

- With 2 EB lanes already over capacity, EB Page Mill cannot handle the faster flow of traffic from the SB ramp
- Cycle track may not work with 6-lane widening
- Pedestrian provisions left unfinished in EB direction
- First phase of signal only will not address current bicycle conflict zones
- May be difficult to re-engage parties and find funding for future phases

2003 Expressway Study Concept

2003 Expressway Study Concept

Advantages

- Removes free-flowing dual right lane on/off-ramp conflicts for bicyclists and pedestrians
- Lines up 280 SB off-ramp with on-ramp discouraging cut-thru traffic on Arastradero

Disadvantages

- Replacing free running right turn on-ramps with a signalized left turn will create some delay for PM WB Page Mill commute traffic returning to San Jose

Roundabout – Alternative #3

- Roundabout alternative for SB off-ramp/on-ramp is under development
- To be provided for review and input at a community meeting in November timeframe

Analysis Process

- Data collection
 - Auto and bicycle volumes and accident history
- Micro-simulation modeling of alternatives
 - Simulate peak period traffic flows under each of the three alternatives
 - Refine alternatives based on simulation
- Compare performance of alternatives
 - Evaluate vehicle delay, queuing, and travel time
 - Examine multi-modal conflict points
- Review design feasibility and prepare cost estimates

Expressway Plan 2040

Next Steps

- Community meetings to present concepts and findings
 - Foothill Expressway community meeting hosted by Los Altos on October 21
 - Page Mill Road Expressway community meeting to be scheduled
- Presentations to City Commissions and Councils
- Incorporate into Expressway Plan 2040
