

Reduce Interstate 280 Highway Noise!

Interstate 280 average noise power exceeds the limit by a factor of 10; the peaks are almost 320 times louder than the Town's limit!

There is a solution; a rubberized road-surface will greatly reduce tire roar, but Caltrans has said that we will have to wait at least SIX YEARS to do it!

Please join in signing a petition to repave I-280 between Page Mill Road and the Foothill Expy/I-280 crossing with the new rubberized road surface at the earliest possible date.

Much more information about this initiative can be found here:

<http://www.pagemill280.org/Noise/Noise.htm>

The on-line petition can be found here:

<https://www.change.org/p/bijan-sartipi-reduce-hwy-280-noise-in-los-altos-los-altos-hills>

Or, if you prefer, email I280Noise@gmail.com asking that your name be added to the petition. Please include a name and address.
