

## PUBLIC WORKS REVIEW COMMENTS

September 15, 2021

Residents  
Los Altos Hills, CA

**SUBJECT: PUBLIC NOTIFICATION OF ROOT FOAMING PROJECT,  
FROM 9/22/21 TO 10/01/21**

Dear Residents:

The Town has engaged Duke's Root Control, Inc. to perform root foaming on Town's sanitary sewer mains that have been identified with root problems. This maintenance routine is essential to control root growth in the sewer mains and prevent sewer backups and overflows of which incidents in the past had been primarily caused by roots. The root foaming routine is tentative scheduled from 9/22/21 to 10/1/21 at various locations per the attached map. From time to time, Duke's crew will need to access to the sewer mains located within easements on private properties with equipment. The crew will contact you if the routine is to be done on your property. However, if you are not home, they will leave a door hanger for you to contact them to grant access. All Duke's employees have photo ID badges that residents are encouraged to review and verify. We appreciate your time and cooperation with this process.

If you have any questions or would like to discuss any concerns, please contact Consultant Engineer, Jen Chen, at 650-947-2507 or email at [jchen@losaltoshills.ca.gov](mailto:jchen@losaltoshills.ca.gov).

Sincerely,

Oscar Antillon  
Public Works Director
